Hi Kim,
Please find attached the lab results from our latest air sampling and the memorandum provided by EH&E. We are planning to install the additional sealant over the next few weeks.

I have also attached some images of the new building. We are still on schedule for February, 2014 occupancy.

Let me know if you have any questions.

Manny and Ray,
The latest results from air sampling at Estabrook are attached. Bullet five under the summary of findings recommends that additional sealant be applied over the existing sealant for five classrooms. Please coordinate this work being completed before the last air sampling this school year, which is planned for June. Confirm with Matt Fragala when the sealant will be applied so that the date for the sampling can be scheduled.

Let me know if you have any questions.
